NUMEK · DATATRUST

Text Reliability Intelligence

3 evidence-qualified findings; required checks completed over applicable records. Bounded investigations disclose their examined scope.

Schema 1.5 · text_reliability_v1 · 2026-10-11T13:03:09.373675+00:00

1. Summary and actionability

Deterministic violations, contextual observations, heuristic candidates and model-assisted candidates have distinct meanings. This audit provides no universal score or correctness certificate.

Sources	4

Private evidence binding	`077d92c5368b5d8248efbf3752a829c7a29a4d5c265446c1e88312bfce44a2c2`

Priority actions

Exact Duplicates: 1 · contextual observation. Review split assignments and legitimate shared content before removing or moving any occurrence.

Exact Duplicates: 1 · contextual observation. Review split assignments and legitimate shared content before removing or moving any occurrence.

Passages: 6 · heuristic candidate. Resolve original passage spans and review provenance and evaluation exposure.

2. Corpus integrity

Invalidity deterministic violation

full population

Invalid items	0
Reasons

Extractive character coverage	0.00207317
Unknown judgment is negative	No
Transformed chunk alignment claimed	No

7. Comparisons and model evidence

No applicable evidence in this topic. See check applicability and coverage in strict JSON.

8. Methods and coverage

Required checks cover framed records and valid applicable mapped items. Invalidity remains counted. Vocabulary, lexical, passage and semantic investigations disclose selected scope. Approximate candidate search and work bounds can miss qualifying pairs. Template overlap and related document families require context.

Use the separate protected manifest and unchanged local sources to resolve opaque references. Sources and private paths are excluded from these exports. Privacy defaults do not make aggregates anonymous.

Lexical Selection

Framed records	5,455
Invalid records	0
Content population	5,383
Valid applicable population	5,383
Eligible population	5,383
Selected population	128
Selection	evaluation priority then seeded stratified round robin v1
Seed	0
Representation	nfc
Excluded for length	0
Excluded for unit budget	5,255
Population estimate	No
Retained selected strata	6

Repetition

Examined units	128
Grapheme visits	60,432
Stop reason	selected scope completed
Population and selection	Same catalog, strata and seed as lexical selection above; additional method exclusions are listed here

Vocabulary

Examined units	128
Token occurrences	10,770
Stop reason	selected scope completed
Vocabulary is lower bound	Yes
Population and selection	Same catalog, strata and seed as lexical selection above; additional method exclusions are listed here

Near Duplicates

Candidate search	exhaustive selected unique units
Unique candidates	276
Candidate emissions	276
Omitted bucket emissions	0
Pair selection	requested evaluation then evaluation training then other requested then remaining v1
Indexed unique units	24
Excluded unique units	103
Shingle positions	9,080
Signature hash evaluations	996,660
Verified pairs	276
Unverified candidates	0
Verification visits	163,737
Candidate recall on this corpus	complete over indexed units
Global absence claim	No
Population and selection	Same catalog, strata and seed as lexical selection above; additional method exclusions are listed here
Candidate profile	20 bands × 7 rows; bucket cap 1024; calibration applies only to recorded fixtures

Passages

Representation	raw
Indexed units	128
Excluded units	0
Fingerprint work	59,928
Candidate emissions	5,813
Potential bucket emissions	8,960
Verified candidates	5,813
Verification visits	49,660
Stop reason	examined fingerprints completed
Candidate recall on this corpus	unknown
Global absence claim	No
Population and selection	Same catalog, strata and seed as lexical selection above; additional method exclusions are listed here

Strict JSON retains all bounded details, selected strata, effective limits and methodology. Human tables summarize nested collections and show at most five entries; retained witness examples show at most two per family.
