Image reliability review

1 evidence-qualified findings across 2 image occurrences; completed execution.

> **COMPLETED** · 2 occurrences. No universal image-quality score. Similarity does not prove leakage or identify a correct annotation. Images, labels and source paths are excluded unless explicitly disclosed.

Priority review actions

near duplicates — 1 observations. Inspect verified local images and supplied declarations; similarity does not prove leakage or identify a correct annotation.

Inventory

occurrences	2 deterministic fact
directory entries	0 deterministic fact
image locations	2 deterministic fact
physical media files	2 deterministic fact
physical alias locations	0 deterministic fact
source populations	source: source_1; role: dataset; occurrences: 1; source: source_2; role: dataset; occurrences: 1 deterministic fact
logical media bytes	269 deterministic fact
metadata bytes	184 deterministic fact

Decode and representations

asset states	decoded: 2 deterministic fact
format extension mismatches	0 deterministic fact
encoded formats	PNG: 2 deterministic fact

modes	RGB: 2 deterministic fact
decoded pixels	4800 deterministic fact
dimensions observed	2 deterministic fact
frame policy	single frame only deterministic fact

Visual evidence

eligible assets	2 contextual observation
exclusions	decoded: 0 contextual observation
contrast	population: 2; minimum: 5.5511e-17; median: 5.5511e-17; maximum: 5.5511e-17 contextual observation
mean luminance	population: 2; minimum: 0.29804; median: 0.29804; maximum: 0.29804 contextual observation
dark fraction	population: 2; minimum: 0; median: 0; maximum: 0 contextual observation
bright fraction	population: 2; minimum: 0; median: 0; maximum: 0 contextual observation
entropy	population: 2; minimum: -0; median: 0; maximum: -0 contextual observation
sharpness	population: 2; minimum: 0; median: 0; maximum: 0 contextual observation
width	population: 2; minimum: 40; maximum: 80 contextual observation
height	population: 2; minimum: 24; maximum: 48 contextual observation
representation	oriented opaque RGB; preview longest side 512; no arbitrary ICC conversion contextual observation
interpretation	Contextual extremes in eligible preview representations, not proof of unusability. contextual observation

Annotation integrity

occurrence states	observed: 2 deterministic fact

validity	valid: 2 deterministic fact
blocked geometric checks	None observed deterministic fact
supplied status	unknown: 2 deterministic fact
invalidity reasons	None observed deterministic fact
normalized occurrences	2 deterministic fact
object visits	2 deterministic fact
mask pixels	0 deterministic fact
empty masks	0 deterministic fact
segmentation raster pixels	0 deterministic fact

Dataset composition

categories	source: source_1; category: category_34d7cc364a59faa2de475f79; annotation instances: 1; image occurrences: 1; source: source_2; category: category_a06b682b20bf24d111ed335c; annotation instances: 1; image occurrences: 1 contextual observation
distinct source categories	2 contextual observation
category detail omissions	0 contextual observation
label cardinality	1: 2 contextual observation
splits	split: split_8746cb8273df8169a033737e; occurrences: 2 contextual observation
box area	population: 2; minimum: 120; maximum: 480; median: 300 contextual observation
crowd objects	0 contextual observation
object locations and sizes	center x fraction: population: 2; minimum: 0.175; maximum: 0.175; mean: 0.175; center y fraction: population: 2; minimum: 0.375; maximum: 0.375; mean: 0.375; width fraction: population: 2; minimum: 0.25; maximum: 0.25; mean: 0.25; height fraction: population: 2; minimum: 0.5; maximum: 0.5; mean: 0.5 contextual observation

mask occupancy	population: 0; minimum: Unavailable; maximum: Unavailable; sum: 0; mean: Unavailable contextual observation
mask occupancy population	Each examined mask independently; overlapping instance areas are not a union. contextual observation
category count policy	Well-formed supplied members; taxonomy violations remain separately accounted. contextual observation
group populations	source: source_1; groups declared: No; complete group occurrences: Unavailable; incomplete group occurrences: Unavailable; distinct complete groups: Unavailable; source: source_2; groups declared: No; complete group occurrences: Unavailable; incomplete group occurrences: Unavailable; distinct complete groups: Unavailable contextual observation

Duplication candidates

bytes - groups	0 contextual observation
bytes - participating occurrences	0 contextual observation
bytes - cross split occurrences	0 contextual observation
native - groups	0 contextual observation
native - participating occurrences	0 contextual observation
native - cross split occurrences	0 contextual observation
oriented - groups	0 contextual observation
oriented - participating occurrences	0 contextual observation
oriented - cross split occurrences	0 contextual observation
annotation disagreement - compatible exact raster groups with differences	0 contextual observation
annotation disagreement - payload difference groups blocked	0 contextual observation
annotation disagreement - correct label identified	No contextual observation

near duplicates - qualifying raster pairs	1 investigation candidate
near duplicates - radius	6 investigation candidate
near duplicates - representation	DCT64 opaque RGB preview; seven disjoint partitions investigation candidate
near duplicates - approximate groups are equivalence classes	No investigation candidate

Split and version comparisons

population delta	0 contextual observation
reference exact content overlap occurrences	0 contextual observation
reference	source_1 contextual observation
current	source_2 contextual observation
reference population	1 contextual observation
current population	1 contextual observation
added	0 contextual observation
removed	0 contextual observation
alignment	explicit_logical_keys contextual observation
aligned	1 contextual observation
changes	taxonomy changes: 0; byte changes: 1; native raster changes: 1; oriented raster changes: 1; split changes: 0; group changes: 0; annotation state changes: 0; annotation payload changes blocked: 1 contextual observation
occurrences with duplicate source keys	0 deterministic fact

Methods and coverage

execution	completed execution disclosure
source integrity	Verified per-file bytes and directory membership; no atomic filesystem snapshot. method boundary
search	Bounded candidates do not establish global absence, leakage, or annotation correctness. interpretation boundary
inventory	required occurrences: 2; inventory complete: Yes coverage
visual quality	eligible: 2; examined: 2; ineligible: 0 coverage
visual extremes	eligible: 2; maximum examples per metric end: 5 coverage
annotations	occurrences examined: 2; segmentation raster work: 0; segmentation raster limit: 100000000; topology and semantic correctness: not assessed coverage
exact duplicates bytes	representation: bytes; eligible occurrences: 2; group detail omissions: 0 coverage
exact duplicates native	representation: native; eligible occurrences: 2; group detail omissions: 0 coverage
exact duplicates oriented	representation: oriented; eligible occurrences: 2; group detail omissions: 0 coverage
annotation disagreement	variant comparisons are bounded: Yes coverage
versions	aligned: 1; detail omissions: 0 coverage
near duplicates	indexed rasters: 2; partition entries: 14; saturated buckets: 0; posting visits: 42; posting rows loaded: 14; posting cache limit bytes: 33554432; hamming comparisons: 2; pair populations: split: split_8746cb8273df8169a033737e; query population: 2; reference population: 2; queries started: 2; queries completed: 2; posting visits: 42; hamming comparisons: 2; qualifying emissions: 2; posting saturation visits: 0; scope: within_split; cross split queries complete: Yes; cross split stop reason: Unavailable; stop reason: examined_scope_completed; detail omissions: 0; absence claim: examined scope only; capped postings do not establish global absence coverage

Schema 1.6 · image_reliability_v1 · 2026-10-12T00:37:00.273723+00:00. Tables are presentation-bounded; strict JSON retains the bounded analytical evidence and coverage. Resource settings are safeguards, not capacity guarantees.
