Financial evidence reconciliation

cross_representation_reliability_v1 · Schema 1.7 · 2026-10-12T22:01:50.596290+00:00

2 review findings. Required structural checks completed; reconciliation and model scope remain explicit.

> COMPLETED · 41 physical source records (including manifests) · 21 documents. No universal reliability score. Agreement concerns declared, examined evidence. Model candidates require human investigation. Reviewer decisions are separate from this analytical report.

Priority review actions

Review discrepancies and unresolved evidence · High

rule_1: {'satisfied': 18, 'violated': 1, 'conflicting_evidence': 1, 'records': 20, 'incomplete_records': 0, 'method': 'decimal'}

Inspect the exact linked evidence, declarations and unresolved context before correcting an association or value.

Review mixed evidence · Moderate

selected_claims_and_pairs: {'mixed_evidence': 1}

Inspect the exact linked evidence, declarations and unresolved context before correcting an association or value.

Coverage, execution and limitations

Structural populations, bounded discovery, failed methods and presentation omissions are different. Missing evidence does not prove a false claim. Supplied authority does not establish external truth. Resource defaults are provisional safeguards; sampled RSS can overshoot.

Technical evidence

Strict JSON retains every computed bounded record. Opaque references resolve through the protected local manifest. Default exports omit source content and paths.
